

# BookerLAB™

## D6 Infusion Console Line Out Cable

The D6 Infusion Console Line Out Cable from BookerLAB enables the connection between a Hammond® console and a ¼" line level input. Instant connectivity is achieved by plugging the 6-pin connector into a pre-wired 122 or 147 output.

### Compatibility & Connectivity

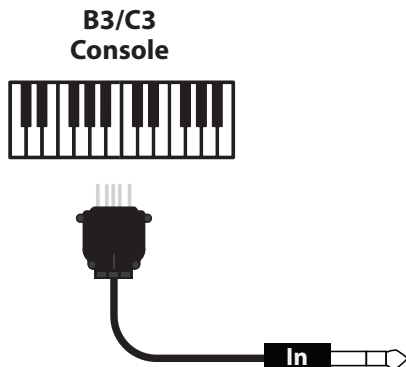

The D6 Infusion makes it easier than ever to connect to various line-level peripherals without the need for a technician.

### Isolation

The D6 Infusion gives an isolated and reduced line level "dry" organ signal from the console.

### Cabling & Connectors

Equipped with 15' of cabling, the D6 Infusion terminates in a ¼" TS Mono plug.

Quickstart

BookerLAB was created to maintain the quality of vintage musical instruments and supporting equipment, specifically the Leslie® Speaker Cabinet. BookerLAB offers a range of products for interfacing gear, conversion, motor control, and amplification. With products built solely in America, we've developed these unique systems in collaboration with music industry partners. Explore our story at [www.bookerlab.com](http://www.bookerlab.com).
