

BookerLAB™

EBY-2 Connector

The EBY-2 Connector from BookerLAB: upgrade, retrofit, and enhance your amplifier.

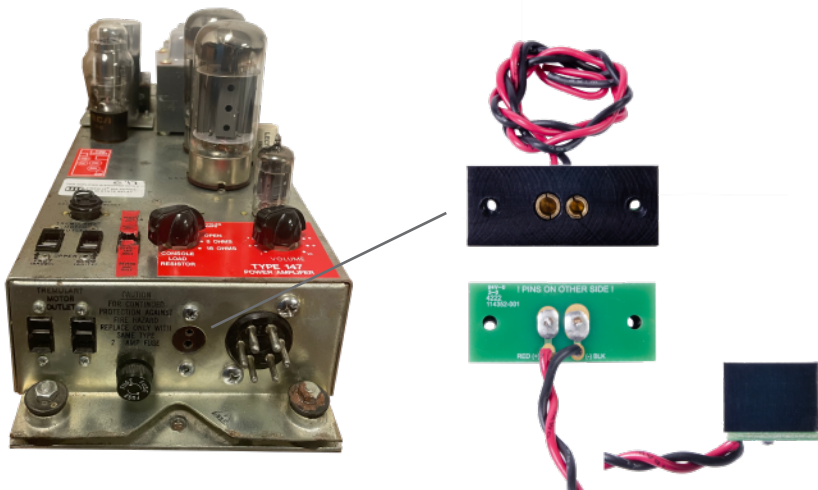

The EBY-2 is the only speaker connector accessible for amplifiers that utilize a 2-pin speaker connection. Incorporated as a standard feature on the BookerLAB® Rebellion Amplifier, the EBY-2 is now available as a standalone solution for use in vintage amplifiers, too.

Retrofit and Enhance Your Amplifier

The EBY-2 Connector provides connectivity for 2-pin speaker interfaces.

Easy Upgrade for Vintage Gear

With a small footprint, the EBY-2 also includes 15 inches of wire for installation.

BookerLAB was created to maintain the quality of vintage musical instruments and supporting equipment, specifically the Leslie® Speaker Cabinet. BookerLAB offers a range of products for interfacing gear, conversion, motor control, and amplification. With products built solely in America, we've developed these unique systems in collaboration with music industry partners. Explore our story at www.bookerlab.com.

Please visit BookerLAB.com for more configurations and technical specifications. Leslie® is a registered trademark of Hammond Suzuki Corporation.
