

BookerLAB™

D5 and D6 Infusion Console Line Out Cable

The D5 and D6 Infusion Console Line Out Cables from BookerLAB convert the audio signal from a Hammond® console to a ¼" line level output. Expand your console's connectivity to any line level peripheral you desire.

The cables are designed to pair perfectly with our Fusion Preamp Interface, Fusion LBB Breakout Box, and Rendition 11-pin Interface Pedal. They are available in either 5-pin (D5) or 6-pin (D6), depending on the console's output layout.

Compatibility & Connectivity

The Infusion makes it easier than ever to connect to various line level peripherals without the need for a technician.

Isolation

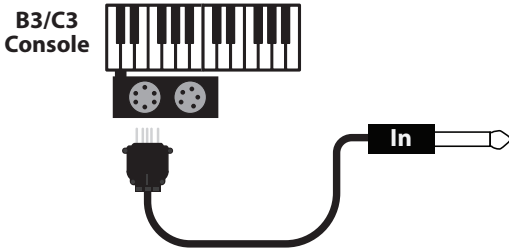

The Infusion creates an isolated and reduced line level audio signal from the console.

Cabling & Connectors

Equipped with 15' of cabling, the Infusion features a male 5-pin or 6-pin Amphenol plug that terminates in a ¼" TS jack.

Models:

- D5 Infusion: 5-pin male Amphenol to ¼" TS jack.
- D6 Infusion: 6-pin male Amphenol to ¼" TS jack.
